

Please do not weaken Wisconsin's No-Call Law. The people are absolutely clear as to their feelings about telemarketing. Democratically speaking, how can the overwhelming majority of American citizens be ignored. At some point in time the overwhelming wishes of the people must take precedence over corporate greed!

My husband is blind, and I have joint pains. Hurrying to the phone, only to find an unsolicited salesperson, is not worth physical injury. Businesses and towns are allowed to have "no soliciting" signs on their doors; why can't we have the same for personal privacy in our homes?? Since the No Call law, we have also seen a decrease in scam phone calls.

Please do the right thing. For once, let the people speak and please act on their wishes. Choose the American people over corporate greed! Thank you! Larry and Joan Stephenson
